- Update on moving to ESRI Geoportal 1.2.9
  - DCAT metadata harvesting
  - Allows us to harvest from ESRI Open Data Portal / Hub

Discussion of Upcoming Work

- Desired updates to the ODP portal front end
  - Priorities for what we want
- Mechanisms for getting the above updates done

Desired updates to the ODP front end

- New content
  - Stories al la MARCO
  - New Data connections
- BugFixes vs. New / Upgraded functions in the Visualize tool / Marine Planner
  - Bugs in the ODP interface https://github.com/WCGA/West-Coast-Ocean-Data-Portal/issues
  - Bugs in the Marine Planner https://github.com/WCGA/Marine-Planner/issues
- Connections to New Partners
  - DataBasin
  - ScienceBase
  - PISCO
  - Washington MSP

Mechanisms for getting updates done

- What can be done in house?
  - Choosing / writing stories
  - Prioritize bug fixes to MarinePlanner / ODP for Ecotrust

- What contracts need to be created?
  - Technical assistance from Allison
    - Geoportal upgrade to 1.2.9
    - New Data Partner connections / data curation
    - Spatial Coordination Framework
      - Watershed based notification areas?
      - Thematic notifications?
  - MarinePlanner work with Ecotrust
    - Bundles of fixes that are logically grouped to be fixed together
